

Xerox® Capture and Content App

Transforming manual, paper-driven business processes into digital.

Xerox® Capture
and Content App

We help you automate **labour-intensive workflows** by **capturing and managing content** for seamless collaboration and increased productivity.

With this app on your Xerox® ConnectKey® Technology-enabled multifunction printer (MFP), you just walk up, scan your documents and connect to Xerox® Capture and Content Services¹ integrating into centrally managed workflows.

WORKFLOW

Your workplace assistant is ready and waiting.

Streamline workflows and tame complex or time-consuming processes in any work setting with Xerox ConnectKey Technology-enabled devices and apps.

Simplify and automate tasks, ensuring that documents are sent directly to the systems your business relies on – with minimal touches – and meet your specific needs.

After receiving the documents, our **Global Capture Platform** delivers intelligent capture capabilities integrating the scanned pages using the MFP app with other documents coming from multiple sources, such as scanners, on-site centres, off-site locations, and Xerox scanning and indexing centres. It's designed to automatically extract data, classify documents and route critical information to initiate processes in downstream line of business systems and content management platforms.

xerox™

It's just what you need for capturing your documents to business workflows.

Xerox® Capture and Content App

Finding new ways to automate and streamline everyday business processes can save time and money. With Xerox Capture and Content App and Xerox Capture and Content Services you can open new possibilities for a more efficient workplace.

USE CASE EXAMPLES.

Accounts payable services.

Invoice capture, match and validate service, which provides structured output data for easy integration.

Digital postroom services.

Access inbound paper and digital mail regardless of location. Automated feed of core client workflow solutions and content management tools.

Backfile scanning.

Capture documents with intelligence to ensure accessibility and security.

Health records automation.

Change the way patient records are recovered, stored and accessed, with full security standard compliance the whole way through.

THIS IS HOW IT WORKS.

1. Select one of the available workflows.

2. If needed, enter any additional information.

3. Select scanning options and scan the document.

4. Check Job Summary and receive confirmation.
